Education

AUG 2014 - MAY 2020
Bachelor's in Computer Science
San Francisco State University

Projects

Online Portfolio (2022)

- NextJS, Bootstrap, Figma
- Designed online portfolio using Figma
- Implemented design using Next.js and Bootstrap
- Added responsiveness for mobile devices

Queue Site (2020)

- ReactJS, Django, Python, Bootstrap
- Web application dedicated for placing orders for customized business cards or flyers
- Implemented API endpoints calling our Django backend
- Utilized React and Bootstrap to create main page and order form page, and to save or retrieve data from backend

Gator Media (2020)

- HTML, CSS, JS, Bootstrap
- E-commerce platform created by a team of 6 students where San Francisco State students and faculty can purchase/sell digital media for extra income
- Worked as a frontend developer to implement the main dashboard and view content pages

About Me

Full-stack Software Engineer with experience building web APIs and integrating them with modern frontend frameworks.

Experience

July 2025 - Present

Software Engineer II First American

- Used AI tools (Claude, Cursor) to migrate a legacy application to React with an internal component library
- Built and improved Claude skills to help retain application context during React migration

April 2023 - July 2025

Software Engineer Endpoint

- Developed frontend features in React, TypeScript, and GraphQL within a collaborative team environment
- Wrote Cypress and Jest tests to ensure coverage for new features

March 2022 - March 2023

Full Stack Software Engineer Apple

- Built internal scheduling calendar features using React and Django
- Customized React QueryBuilder library to help users create complex queries in a user-friendly way
- Developed Django API endpoints for frontend-backend data interaction
- Wrote and maintained Django unit tests for APIs

May 2021 - Dec 2021

Junior Software Developer Cloud Peak Law

- Built a custom email editor for admins to send personalized lead emails using Python, Django, HTML, CSS, and JavaScript
- Helped redesign an order form using Vue along with Django endpoints to display dynamic form data

Sept 2020 - Dec 2020

Software Engineer Intern Sunshine Life & Health Advisors

- Transformed Figma designs into full-stack web applications using React, Semantic UI, Django, and PostgreSQL

Professional Skills

Typescript	Javascript	React	Python	Django
Cursor	HTML	CSS	Vue	Postgres
Claude	Figma	MySQL	Github	Cypress
