Strong Communication

ABOUT ME

Passionate software engineer with a knack for turning ideas into functional, user-friendly web applications, and a growing curiosity for exploring how AI can shape the way we build.

EXPERIENCE

SOFTWARE ENGINEER II

First American

July 2025 - Present

- Leveraged AI tools (Claude and Cursor) to migrate a legacy application to React and developed Claude skills to maintain application context throughout the migration process.

SOFTWARE ENGINEER

Endpoint

April 2023 - July 2025

- Delivered frontend solutions using React, TypeScript, and GraphQL, leveraging Cypress and Jest to maintain robust test coverage and support reliable releases.

FULL STACK SOFTWARE ENGINEER

Apple

March 2022 - March 2023

- Engineered scheduling calendar functionality using React and Django, enhanced the React QueryBuilder library for complex query generation, and built robust Django APIs with unit tests to ensure reliable frontend-backend interactions.

JUNIOR SOFTWARE DEVELOPER

Cloud Peak Law

May 2021 - Dec 2021

- Developed a custom email editor for personalized lead outreach using Python, Django, HTML, CSS, and JavaScript, and contributed to a Vue-based order form redesign with Django APIs for dynamic data handling and improved user experience.
